EXPERIENCE

Full Stack Developer Intern | National Informatics Centre, Sri Vijaya Puram

May 2025- July 2025

- Contributed to the development of the Integrated Petition Management System (IPMS) using HTML, CSS, JavaScript, Bootstrap, Django ORM, and MySQL.
- Developed an NLP-powered document navigation module using spaCy, built analytics dashboards and implemented cascade deletion for complaint management.

PROJECTS

FoodHub - Multi-Restaurant Food Ordering Platform

[\[Github\]](#) | [\[Live Demo\]](#)

- Developed a full-stack multi-restaurant food ordering platform using Node.js, Express.js, MongoDB, EJS, and Bootstrap, implementing JWT-based authentication and role-based authorization for customers, restaurant owners, and administrators and built dedicated dashboards for each role.
- Implemented CRUD operations for users, restaurants, menus, categories, order placement and order status with Multer for image uploads and deployed the application on Render with MongoDB Atlas.

Portfolio Website

[\[Github\]](#) | [\[Live Demo\]](#)

- Built a responsive single-page portfolio website using React.js, React Router, Vite, Tailwind CSS, and JavaScript, incorporating client-side routing and a mobile-first, interactive user interface.

Eye Disease Classification and Severity Grading

[\[Github\]](#)

- Developed a hybrid deep learning pipeline using EfficientNetB0 for feature extraction and Graph Convolutional Networks (GCN) for multi-class classification of retinal fundus images.
- Designed a severity grading framework by identifying disease-specific clinical biomarkers, applying computer vision techniques for feature localization and quantification, and validated the results using statistical analysis.

Credit Card Financial Dashboard

[\[Github\]](#)

- Built an end-to-end business intelligence solution by integrating MySQL with Power BI, using Power Query for data transformation and DAX for calculated measures and KPIs.
- Implemented dynamic filters, slicers and charts to deliver financial insights.
